### Learning objectives

After attending this program, the learner will:

[VIEW PROGRAM AVAILABILITY](#)

- Demonstrate an understanding of the types of cancer and its collective prevalence in today's society
- Describe the various treatment therapies and modalities
- Identify clinical resources for cancer patients and advocate for their use in the acute care setting
- Recognising and responding to complications and side-effects associated with Cancer therapies

### What participants say:

*“As a new oncology nurse this program has helped to improve my knowledge especially in areas relating to haematology as I had little knowledge in these areas.”*

*“The patients experience presentation also highlighted how valuable honest and respectful communication and dignity is for our patients.”*

*“Better understanding of how people with cancer can feel both physically and emotionally. to never assume people are aware of their diagnosis and having open communication. putting in place nursing care and prevention for people with neutropenia sepsis.”*

### Who should attend?

Health care professionals who manage care for patients with cancer outside of a cancer dedicated department. Healthcare professionals new to the cancer setting.

### Facilitator

**Catherine Parker & Andrew Steele** | CNM | Medical Oncology | Organisation
