

Palliative Care Introductory study day

This **Clinical** program provides staff with a basic understanding of the clinical assessment and management of patients with a wide variety of palliative care issues including terminal care.

[CLICK TO REGISTER](#)

Clinical experts will present interactive sessions that will improve participants knowledge on how to support patients receiving palliative care and focus on nursing attitudes and self-awareness when faced with distressing situations.

Learning objectives

After attending this program, the learner will:

- Develop new communication skills and confidence in exploring what palliative care is to patients and families
- Attain insight into their personal attitudes when caring for the dying
- Be able to recognise a patient approaching terminal care and advocate for commencement of the Care Plan for the Dying
- Advocate patients' needs to colleagues for action

What participants say:

"It's taught me so much on how to communicate and have difficult conversations with patients"

"I am going to volunteer for the ambulance wish!"

"This was the best education session I've ever had. Completely comprehensive, engaging and brilliantly presented. I learnt so much and made me reflect on past experiences which I believe will better my professional practice ... I have highly recommended the study day into other colleagues since. Thank you for such a wonderful and informative day. You're all brilliant!"

Who should attend?

All nurses and health care professionals working in a healthcare service.
