

Respiratory in the Spotlight

This **Clinical** program enables learners to enhance their knowledge on a variety of respiratory conditions and gain understanding about the management of respiratory patients through interactive practical sessions and case studies.

[CLICK TO REGISTER](#)

Learning objectives

After attending this program, the learner will:

[VIEW PROGRAM AVAILABILITY](#)

- Gain fundamental knowledge on the pathophysiology of common respiratory diseases and the management of these conditions
- Implement best practice when caring for a patient receiving a variety of respiratory therapies e.g. non-invasive ventilation (NIV), intercoastal catheters (ICCs), high flow nasal oxygen (AIRVO) and tracheostomies by applying theory to practical workshops
- Identify a patient in respiratory compromise and use assessment frameworks to safely manage patients in respiratory distress through the appropriate application of oxygen devices and the correct use of inhaled medications

What participants say:

This is a new study day for 2024.

Who should attend?

All nurses and health care professionals working in a healthcare service.
