## Learning objectives

After attending this program, the learner will:

- Describe the pathophysiology of strokes and the associated risk factors
- Differentiate the evidence based best practice treatments utilised for patients post stroke in the acute phase versus the rehabilitative phases
- Explain the roles of the multidisciplinary team in stroke rehabilitation and recovery
- Undertake accurate stroke assessments in the clinical setting in the stable patient and/or deteriorating patient

## What participants say:

*“It has improved my knowledge of stroke (my hubby is a, Ischemic stroke survivor) and as a nurse, this has added great insight as where I am based at SCGH, there are many stroke survivors The course was also a great refresher in regards to stroke signs and various allied health elements to what goes on behind the scene.”*

*“I will be far more mindful of the stroke arms shoulder.... More mindful of the medication requirements post stroke... Importance of specific notes on mood and behaviours.”*

## Who should attend?

All nurses and health care professionals working in a healthcare service, especially those who work in a rehabilitation setting.

## Facilitator

Katarina Pejic | SDN | Ward 2 | OPH
