

CLINICAL PROGRAM

Neurology Fundamentals

This program provides participants with an overview of current practice in management of neurology patients. Evidence based practice and current trends in neurology are explored via interactive sessions, delivered by a multidisciplinary team of subject matter experts.

Learning objectives	At the conclusion of this study day, the learner will be able to: <ul style="list-style-type: none"> • Develop an understanding of the anatomy and physiology of the brain. • Gain knowledge of how to perform neurological observations and assessments accurately. • Identify signs and symptoms and develop understanding of the pathophysiology of the deteriorating neurological patient. • Gain insight into common neurological disorders such as stroke, epilepsy, multiple sclerosis and Parkinson's disease.
What Participants Say?	<p><i>"Highly recommend this study day for anyone that has an interest in neurology"</i></p> <p><i>"Pre reading was good, I'm glad I was prepared for the day. It is a very well planned, educational and interesting day"</i></p> <p><i>"Jo the MND presenter was excellent, that said all were good. Thank you for the day"</i></p> <p><i>"NIISWA presenter was excellent. Love his ways of explaining everything in a way anyone can understand it"</i></p> <p><i>"I found every speaker was interesting and enjoyable to listen to, with examples of case studies and following a patient's journey (ie stroke)"</i></p>
Who should attend?	All nurses and health care professionals working in a healthcare service.
Program preparation	Completion of learning activities via online learning (Moodle).
